

# AquaFlex®

Surfacing that delivers comfort, aesthetics and safety.

AquaFlex at The Cosmopolitan of Las Vegas®

AquaFlex at Aria® Las Vegas Hotel

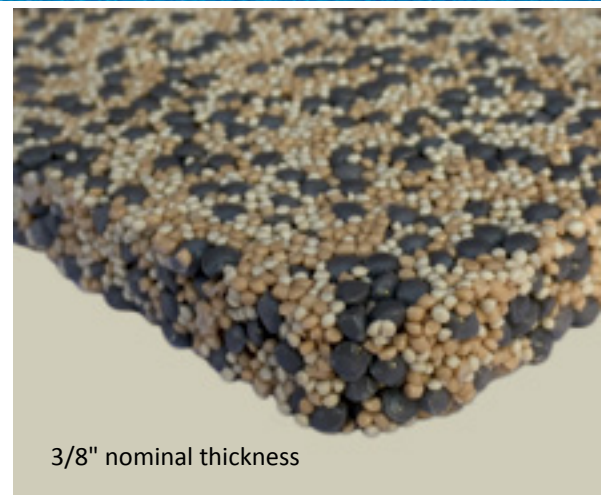

**SURFACEAMERICA®**

Renaissance Hotel & Resort – Marriott

## Advanced Technology for a Beautiful, Comfortable, Safe and Long-Lasting Seamless Aquatic Surface

- Millions of tiny thermoplastic pebbles are bonded together with strong aliphatic binder.
- Mixed and troweled on site for seamless surface and custom look.
- Pebbles are 100% color throughout with nothing to wear off during use and over time.
- Meets ASTM 1028 standard for slip resistance.

3/8" nominal thickness

The Cosmopolitan of Las Vegas®

Four Seasons Hotel Las Vegas

## AquaFlex®

### Slip & Fall Resistant.

- Slips and falls caused by the surface are virtually non-existent, dramatically reducing legal costs.
- Surface won't bubble, crumble or crack.
- Can be used on steps and indoors, eliminating joints separating surfacing materials.

### Beautiful.

- Many colors that can be mixed to create a color blend that complements resort or hotel design.
- Borders, patterns and logos can be shaped and molded into the full-depth of the surface.
- UV light stable so pebble colors won't fade.

### Long-Lasting.

- Resistant to chlorine and water.
- Maintains its flexibility to expand and contract with subsurface movement.
- Surface stands up to power washing and approved cleaning agents.

## AQUAFLEX® COMMON COLOR BLENDS

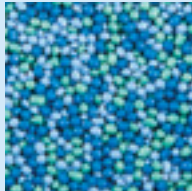

Color blends can have up to 4 colors:

- 2-color (50/50)
- 3-color (50/25/25 or 33/33/33 for Porous only)
- 4-color (25/25/25/25)

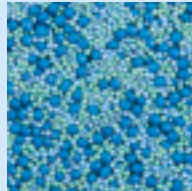

Virtually endless color possibilities. Here are some common blends.

COLOR	POROUS	NON-POROUS
-------	--------	------------

### AQUA

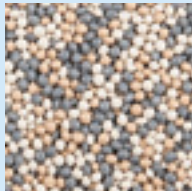

33% Large Royal Blue  
33% Large Light Blue  
33% Large Teal

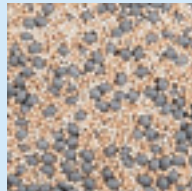

50% Large Royal Blue  
25% Small Light Blue  
25% Small Teal

### SHELL

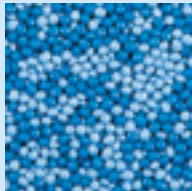

33% Large Gray  
33% Large Cream  
33% Large Tan

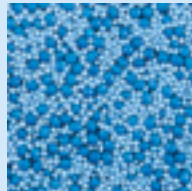

33% Large Gray  
33% Small Cream  
33% Small Tan

### COBALT

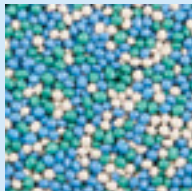

50% Large Royal Blue  
50% Large Light Blue

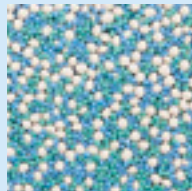

50% Large Royal Blue  
50% Small Light Blue

### SKY

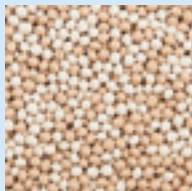

33% Large Cream  
33% Large Teal  
33% Large Light Blue

33% Large Cream  
33% Small Teal  
33% Small Light Blue

### WHEAT

33% Large Cream  
33% Large Tan

33% Large Cream  
33% Small Tan

Note: Any installation of AquaFlex that exceeds 3,000 square feet should be designed to have color changes in the surface design to minimize the need to have visible cold joints between surface pours of the same color. Contact your surfacing consultant for more details.

## AQUAFLEX® SYSTEMS

**AquaFlex® Porous** allows water to penetrate through the surface and is the most common application for outdoor environments.

**AquaFlex® Non-Porous** allows water to run across the surface and to drains, and is most common for indoor environments.

## AQUAFLEX® COLORS

There are 15 standard colors. We recommend against a single solid color system - except for borders and/or small size graphics - as blends minimize any color variations in pebbles.

### LARGE & SMALL PEBBLES

Cream

Gray

Teal

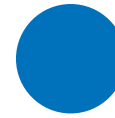

Light Blue

Moss Green

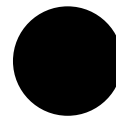

Red

Royal Blue

Tan

Black

Brown

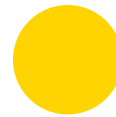

Dark Green

Brick Red

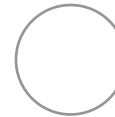

### LARGE PEBBLES ONLY

Yellow

Orange

White

Note: Color(s) may vary slightly from samples shown. Other colors available upon request for custom blends.
